### DETAILED ACTION

1. The application filed 1/22/04 has been examined. Claims 1-9 are pending.
2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
3. The IDS filed 4/30/04 has been considered.
4. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
  - A. As per claim 1, the claim is indefinite because of the multiple use of the alternative "and/or". The examiner suggests using the phrase --at least one of ... and ....
  - B. As per claim 6, "the incremental position encoder" lacks antecedence.
  - C. As per claim 7, note comments above for claim 1.
  - D. All claims depending from a rejected base claim are also rejected as containing the same deficiencies.
5. Claims 1-9 are distinguishable over the prior art. As per claim 1, the prior art of record does not show or reasonably suggest, in combination with the other claimed subject matter, a method for determining a displacement state of a clutch actuator driven by an electric motor in which the armature resistance of the motor is determined and used in conjunction with applied motor voltage and measured motor current to calculate at least one of induced motor current and voltage from which the displacement state is determined. Dependent claims 2-9 are distinguishable for at least the same reasons.

Art Unit: 3661

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited documents are of general interest.
